CAREER OBJECTIVE

Passionate web developer with knowledge of React.js, Next.js, Node.js, and MongoDB. Seeking an opportunity to build modern, user-friendly web applications while improving my technical and problem-solving skills. Eager to grow as a professional developer and contribute to innovative projects.

Technical Skills

Programming Languages: JavaScript

Frontend : React.js, Next.js, JavaScript (ES6), Tailwind CSS, DaisyUI, Hero UI, **Bootstrap (Basic)** , HTML5, CSS3

Backend: Node.js, Express.js

Database: MongoDB

Tools & Technologies: Git, GitHub, Figma, Better Auth, VS Code, REST API

Soft Skills: Time Management, Team Collaboration, Communication Skills, Quick Learning Ability

Projects

1. Fitness & Gym Management Platform [live link](#) | [project code](#) | [server side code](#)

- A comprehensive full-stack fitness management system designed for users, trainers, and administrators to manage fitness activities in a single platform.
- Users can browse and search fitness classes, book sessions through secure Stripe payment integration, and track their booking history in a personal dashboard.
- Trainers can create and manage classes, view enrolled students, and contribute to the community forum by sharing fitness-related posts.
- Administrators have full control over the platform, including user role management (block/unblock, make admin), class approval system, trainer application management, and forum moderation.

2. DriveFleet Car Rental Platform [live link](#) | [project code](#) | [server side code](#)

- Users can browse available cars and make bookings, then view and track all their own bookings in a personal dashboard
- Users can add their own cars to the platform and manage them, including viewing the full list of cars they have listed
- The system allows users to maintain full control over their activity, including car listings and booking history in a unified interface

3. Book Browsing Website [live link](#) | [project code](#)

- Users can browse and search books, view detailed book information, and explore dynamic content through a responsive interface
- Secure authentication system enables users to access personalized features and manage their activity safely
- Efficient book data management with a modern full-stack architecture ensures smooth performance and user-friendly experience
